Subject: Re: Permit #: R9UIC-AZ3-FY16-1 for Excelsior Mining Arizona

Good afternoon Ms. Rumrill,

Please deny the requested permit to Excelsior Mining Arizona relating to the Dragoon area. Groundwater contamination in the currently clean Dragoon area is a major and significant risk. The *in situ* injection method is untested in "greenfields," like those in the proposed area (where there's no existing contamination). Please protect our limited, clean groundwater resources, and the interests of the people who depend on them.

Sincerely,

Lizann Michaud
